Research lines

- Different Crystallisation techniques
- Thermal analysis with DSC, thermogravimetry and thermo-microscopy
- Analysis of powders (morphological analysis using microscopy SEM, determination of granulometry, picnometry, measuring bulk density, measuring flux).
- X-Ray Powder Diffractometry
- Spectrophotometric dosing
- HPLC analysis
- Preformulation and Stability studies
- Protein formulation and delivery
- Nanoparticles formulation and production
- Quality control and GMP
